

To Whom It May Concern,

Referred by a local contractor, I walked into the offices of AET Solar, a Premier Dealer for SunPower. I was not disappointed!

My conversation with Cassidy, the design consultant, was friendly and informative. The 4.103kw system was installed mid year 2010 and is showing consistent reduction of our energy bill. The installation crew was professional and the project was completed in a timely manner, even when additional work was incurred. I was very pleased with the outcome and would recommend AET Solar for your energy needs.
